Eligible to work in Canada

Result-oriented JavaScript Developer with over three years of proven experience who is seeking an intermediate Front-End or Full-stack developer role where can develop web applications using best practices and cutting-edge technologies. At current project work in a team of nine developers and one project manager.

EDUCATION

GoIT Academy, Kyiv, Ukraine

2020 – 2021

Igor Sikorsky Kyiv Polytechnic Institute, Kyiv, Ukraine

WORK EXPERIENCE

Chargebackhelp.com, California, USA, *Front-end Developer*

2022 – 2024

- Built reusable charts with Chart.js and React that lead to improving user experience and speed of the development of the new charts by 100%.
- Migrated over 20 complex components from Vue to React, resulting in a 20% improvement in page load time and an increase in code maintainability and reusability.
- Collaborated with three developers, conducting code reviews of each other, and improving code reusability and readability. As a result, the project benefits, from faster development as each developer knows other developers' reusable features.
- Partnered with a senior developer to create part of the React component library, resulting in a 50% improvement in development speed and the successful delivery of high-quality products across two internal projects.
- Suggested and implemented table usability improvement (highlighting row cells on hover) that enhanced customer productivity by 30% based on project manager feedback. Valuable for everyday usage while comparing table row data with many cells.

Ncube.com, London, UK, *Full-Stack Developer*

2021 – 2022

- Enhanced website's Google Lighthouse score from 60 to 90 by optimizing images, chunking JavaScript, deferring third-party scripts, and creating AMP pages, leading to a 20% boost in search engine rankings.
- Built semantic HTML 100% valid by validator.w3.org, enhancing accessibility, SEO, and cross-browser compatibility, which improved user engagement.
- Created parts of the UI (pop-ups, forms, diagrams, animations) that increased lead generation by 15%.

Itpixie.net, *Full-Stack JavaScript Developer*

2020 – 2021

- Developed static pages with HTML, CSS (used adaptive design), and vanilla JavaScript to have responsive design and a high-performance score of 99 by Google Lighthouse.
- Implemented backend using Node.js and Express, enabling email dispatch from forms, enhancing user interaction, and allowing to send emails at no cost (100 emails per day).

OTHER PROJECTS

Madeirawalk.com (pet project), *Full-Stack JavaScript Developer*

2022 – 2022

- Founded a hiking-themed project, developing 30 reusable React/Next.js components for high SEO optimization and user experience. Wrote engaging posts, and made photos, resulting in 50 monthly organic visits from Google.
- Integrated Sanity (headless CMS) that raised development speed, improved website performance, and allowed to focus 100% on business logic.
- Optimized overall performance to 96% on Google Lighthouse through server-side rendering, content optimization, and JavaScript chunking, resulting in immediate improvement in search engine visibility.

LANGUAGES: Fluent in Ukrainian and Russian, Advanced in English

TECHNICAL SKILLS Proficient in
